

INTRODUCING DEBT MARKET TO INDIA

What is Syndicator?

- A PLATFORM WHICH -

Provides debt syndicating services.

Makes Transaction Seamlessly & Secure.

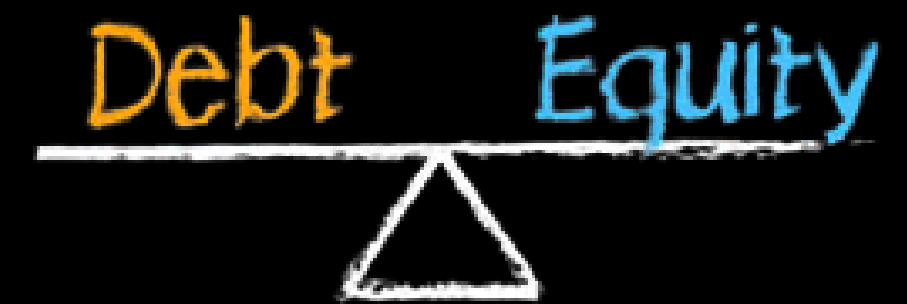

&

Works through
BLOCKCHAIN.

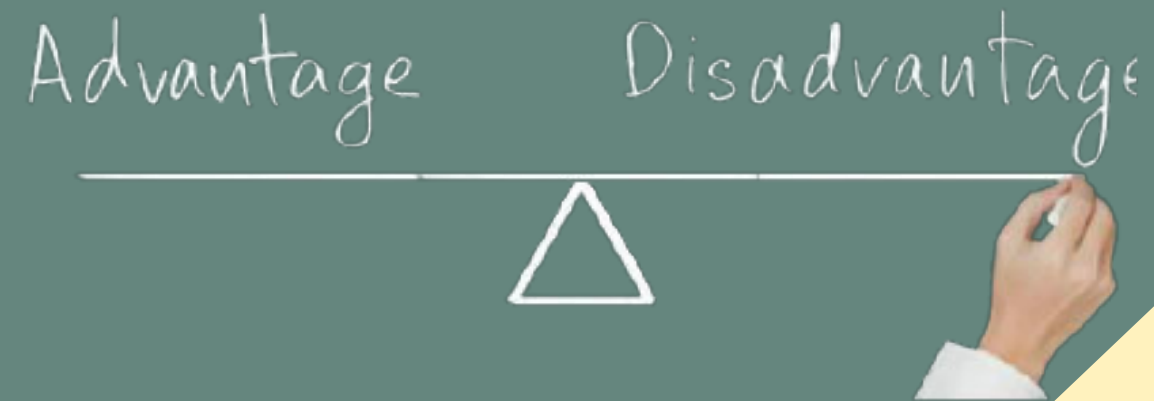

Problem Statements

- ⇒ In India, the debt market is several times smaller than the equity market, while elsewhere it is just a multiple of the latter.
- ⇒ Be it SMEs, mid-corporates or large corporates, all those looking for customized financing solutions for capital intensive projects opt for it.

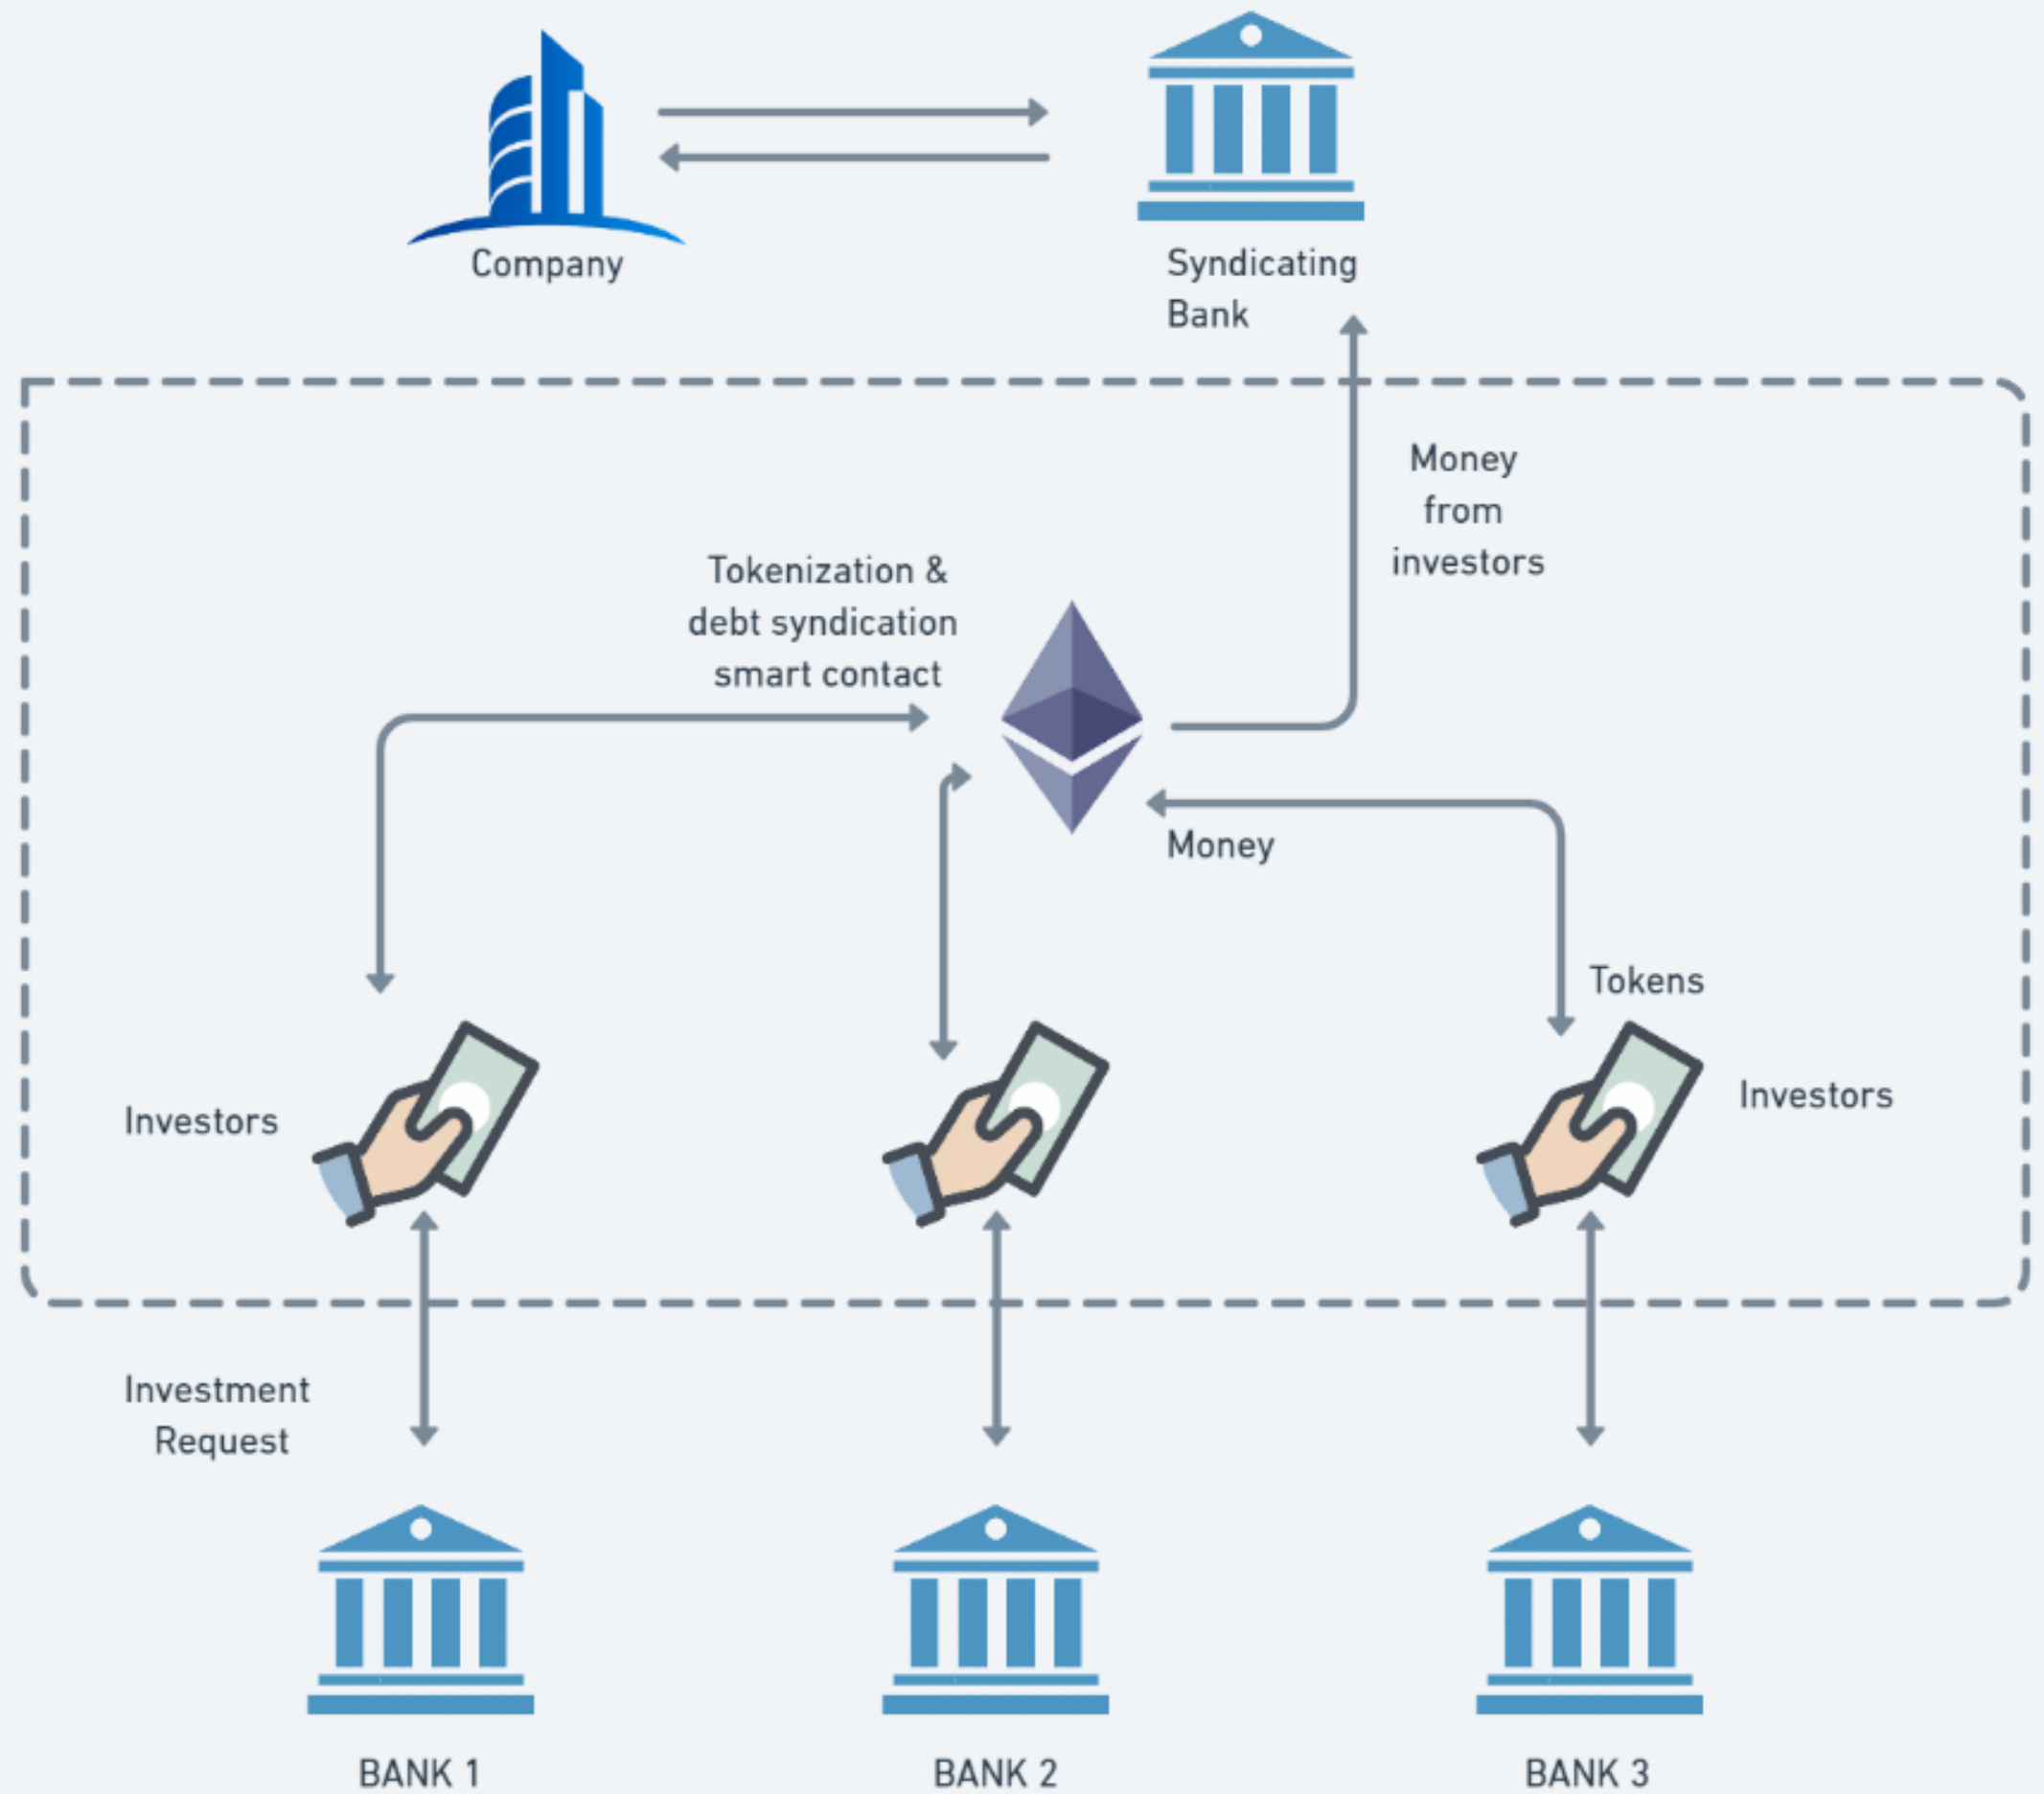

SYNDICATE LOAN

✓ Our Solution

- ➔ One of tools that can bridge the gap between debt and equity market in india is through *debt syndication*.
- ➔ The biggest benefit is that the risk gets spread out across the board. Also, it saves time & effort of borrowers as they only need to meet the *Syndicating bank*.

Business Model

- Our main source of income lies in the difference between the lending and borrowing interest rates.

Future Plans

1

Expand Debt Market in India.

2

We shall try to add a smart auction support for the lender if the borrower goes defaulter.

We're done!

Thank you for giving
us a chance. Good
day!
